Program Highlights

Technical Services

WQA maintains updated equipment performance standards, and its staff provides expert technical support for nearly every sector of the industry.

WQA Technical Reports

WQA and the Water Quality Research Council sponsor and conduct numerous studies and seminars, as well as papers, covering a wide range of topics important to every water treatment professional. Reports include "Septic Tank/Water Softener," "Water Heater/Energy Savings," "Bacteria Colonizing in Filters," "Benefits of Soft Water," and Technical Application Bulletins on every subject from Amonia to Zinc.

WQA Training Seminars

Regular programs are conducted around the United States, Mexico, Canada, and other countries providing training and support to water treatment professionals.

Newsletters, Bulletins, and Publications

A newsletter, along with course books, sales brochures, seminar transcripts, and industry fact sheets, keep members up-to-date on the latest industry news.

Industry Statistics and Marketing Data

Timely reports on dealers' cost of doing business, consumer attitudes toward water quality, customer buying trends, etc., are issued to members. Accountants, bankers, and financial advisors find these reports invaluable when making loans to industry companies, or helping members sell a business. These resources also are valuable when investigating new market opportunities.

WQA on the Web

WQA's Web site provides a vast array of information to members and consumers with point-and-click ease. Services available at the site include membership and equipment directories, the *WQA Glossary of Terms*, a members-only archive of newsletters and related publications, an expanding library of technical articles, and links to other water-related sites on the World Wide Web. **All members** are listed on the site for easy customer access, and can be searched by country, state, or zip code.

Expert Assistance

All WQA members receive assistance to keep them up-to-date with the most recent innovations and industry trends.

Professional Certification

For individuals to show customers and employers that they possess specific up-to-date knowledge and experience, WQA offers a certification program. WQA's home-study text books and seminar opportunities prepare individuals for the exams. Those who become certified have access to logos, pins, and certificates that can be used in advertising and on business cards.

Annual Convention and Exhibition

Besides offering a one-of-a-kind opportunity for members to generate sales leads, network with fellow water quality professionals, and learn the latest industry trends, this annual meeting serves as a forum for educational sessions on important technical, market, and management topics.

Marketing Guidelines and Code of Ethics

To promote the highest principles of honesty and professionalism in the industry, WQA provides members with a strict code for conducting business with customers, fellow industry members, and the public. Its staff works with members to create effective, legal, and ethical advertising that follows industry guidelines.
